

Introduction to Google Earth

A workshop to build teaching competence in using 3D geo-spatial technology in the classroom.

Sponsored by SpatialSci, INC

Professional Development Opportunity For K-12 Teachers

Show your students the world!

Google Earth in the Classroom. Want to learn more about how to effectively use this cool new technology in your classroom? This is the workshop for you. Whether you are a beginning technology user or an old pro, this workshop will help you better understand how this tool can be used across disciplines and grade levels within the context of national and state standards.

The first day of instruction will introduce you to Google Earth, from navigating the globe to creating a virtual tour with embedded videos and images. On the second day, you will learn how to use the more advanced features of Google Earth, like creating image overlays, importing GPS data, and adding voice narration and custom elements to tours.

Come and experience an engaging new way of learning about our world!

Course Dates

Missoula - March 13-14, 2010
Great Falls - April 17-18., 2010

8:00 a.m. - 5:00 p.m. each day

Workshop Costs: \$100 per day
