GIS PROJECT CHECKLIST

All project submissions must include:

- A completed competition entry form.
- Outline of climate changes affecting your community.
- Documentation of spatial data sources.
- Description of how the spatial data helped understand and address the climate changes your community might expect in 2050.
- Description of geospatial tools used.
- At least one, but not more than three, ArcView layout image(s) that makes a unique contribution to understanding and addressing the climate changes your community might expect in 2050.
- Summary of project findings.
- Outline of community solutions.
- Competition submissions should be submitted on CD rom. ArcView maps should be saved as jpeg images.

All project submissions must be **postmarked by March 10th, 2007** and sent to the address below.
