Please list name(s) of students involved in the project, alphabetically _____

GIS PROJECT CHECKLIST

All project submissions must include:

- A completed competition entry form.**
- Outline of how your project makes a unique contribution to understanding and addressing Montana's energy alternatives.**
- Documentation of spatial data sources.**
- Description of how the spatial data helped understand and address Montana's potential for generating electricity through renewable sources.**
- Description of geospatial tools used.**
- At least one, but not more than three, ArcView layout image(s) that makes a unique contribution to understanding and addressing Montana's energy alternatives.**
- Summary of project findings, including an outline of one or more actions that Montana decision-makers and/or Montana residents can make, based on your findings.**
- One new question you now have about alternative energy that you would like to answer using GIS.**
- Competition submissions must be submitted on CD rom. ArcView maps should be saved as jpeg images. Each student or team submitting a project should save their project in a separate folder labeled with their project title.**
- Please include five copies of the CD rom for judging purposes.**

All project submissions should be sent to the address below.
